

A young kangaroo is the central focus of the image, standing upright on its hind legs. It has a light brown, slightly shaggy coat and large, upright ears. The kangaroo is looking directly at the camera with a neutral expression. The background is a soft-focus natural setting with green grass and trees, suggesting a park or a natural habitat. The lighting is bright and even, highlighting the texture of the kangaroo's fur.

Kangaroos

# What are Kangaroos?

A kangaroo is marsupial animal. A marsupial is a mammals that continue to grow and mature in their mother's pouch.

# What do kangaroos do?

Kangaroos hop around a lot. They can reach speeds of 60kph (kilometers per hour). They clear more than 8 meters per hop. Their super strong tail helps them keep balance when they're hopping. Some male kangaroos fight other male kangaroos to impress ladies.

# What do kangaroos eat?

- Kangaroos don't eat junk food instead they eat :
- grasses, flowers, leaves, ferns, moss and even insects.
- They vomit up their food and re-chew it before it is ready to be totally digested

# Facts
