

8. Whole School Involvement

In our school the whole school community is informed very regularly of whatever is taking place among the Green Schools Committee, and we strive to keep as many people on board as possible by demonstrating that it is an on-going process. We use various methods; our Green Schools notice board is prominently located, with regular updates and news e.g. new committee members, elections etc. The Committee officers address the school over the Intercom with news, events, when meetings are taking place and so on. In the Infant end of the school, where the children are too young to organise the bins, we have visits from the older committee members, where they give a mini- workshop on what waste goes into what bin etc. We try to get as much information to the homes of all the children in our school as is possible- we may send a note home.
